September 30, 2023 (Unaudited)

Dear Shareholder,

Alpha Growth Management, LLC (“Alpha”) is pleased to provide the audited annual financial statements for the Alpha Alternative Assets Fund (the “Fund”) for the fiscal year that ended September 30, 2023.

Alpha took over as investment adviser in August 2022. Since then, Alpha embarked on a restructuring and repurposing that brought a change to the Fund’s overall strategy and changes to its business service providers to reduce costs and improve operational efficiencies. During this period, the Fund continued to pay a dividend of 5% and maintained liquidity to accommodate the share repurchases.

Additionally, Alpha has added a Class A share that is available to broker-dealers which expands the Fund’s distribution channels. The Class I shares continue to be offered through the registered investment advisor channels.

The exciting aspect of the change in strategic focus for the fund creates a unique opportunity for our shareholders and prospective investors to participate in esoteric asset classes. The esoteric asset class includes: structured settlement receivables, legal finance, life settlements, pharmaceutical and medical royalties.

Esoterics as an alternative can produce higher returns by avoiding price competition. Esoterics can provide a refuge from the wide swath of asset classes (conventional or unconventional), which share at their core an erosion of alpha via sophisticated and relentless competition. Without the pressure of competition driving prices up to (and even beyond) fair value, esoteric assets can be bought at prices below fair value.

To maintain its ability to provide a dividend and liquidity for repurchases, up to 15% of the Fund’s assets are in high yield short-term securities managed by Haven Asset Management, an experienced fund manager with over 20 years of experience in these types of investments.

Since the end of the fiscal year, we are pleased to report additional subscriptions that bring our assets under management to ~\$19.5 million in November 2023. Alpha continues to deploy new capital into esoteric investment opportunities, further diversifying the Fund’s exposures.

A recent investment focused on a bond issued by an affiliate of a registered charitable foundation that receives life settlements as donations and uses the bond proceeds to fund the premiums for the life settlement. The Fund is pleased that its investment ultimately benefits the charitable work being done by the foundation. For more information on the Fund’s activity, the complete listing of the Fund’s investments can be found in the Schedule of Investments. We expect to continue our investment in these esoteric assets.

On behalf of everyone at Alpha, we thank you for your investment in the Fund. We are honored to be trusted stewards of your capital. We are excited about the year ahead and look forward to working with each of you.

Sincerely,

Gobind Sahney
Principal and Portfolio Manager

2. SIGNIFICANT ACCOUNTING POLICIES

The accompanying financial statements were prepared in accordance with accounting principles generally accepted in the United States of America for investment companies ("U.S. GAAP"). The Fund is considered an investment company under U.S. GAAP and follows the accounting and reporting guidance applicable to investment companies in the Financial Accounting Standards Board ("FASB") Accounting Standards Codification Topic 946 Financial Services - Investment Companies. The preparation of financial statements in conformity with U.S. GAAP requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the period. Actual results could differ from those estimates. The following is a summary of significant accounting policies consistently followed by the Fund in preparation of its financial statements.

Investment Valuation: The market price for debt obligations is generally the price supplied by an independent third-party pricing service approved by the Board, which may use a matrix, formula or other objective method that takes into consideration quotations from dealers, market transactions in comparable investments, market indices and yield curves. If vendors are unable to supply a price, or if the price supplied is deemed to be unreliable or otherwise not representative of market conditions at the time of the valuation determination, the market price may be determined using quotations received from one or more brokers-dealers that make a market in the security. High yield bonds and notes are valued using market models that consider trade data, quotations from dealers and active market makers, relevant yield curve and spread data, creditworthiness, trade data or market information on comparable securities, and other relevant security specific information.

For equity securities and mutual funds that are traded on an exchange, the market price is the closing sale or official closing price on that exchange. In the case of equity securities not traded on an exchange, or if such closing prices are not otherwise available, the securities are valued at the mean of the most recent bid and ask prices on such day.

Money market funds, representing short-term investments, are valued at their net assets value ("NAV").

The Investment Adviser has designated a valuation committee to oversee the funds valuation of the Fund's investment portfolio. Alpha Growth Management, LLC serves as the Investment Adviser.

When such prices or quotations are not available, or when the valuation designee appointed by the Board believes that they are unreliable, securities may be priced using fair value procedures utilized by the valuation designee.

Fair Value Measurements: The Fund discloses the classification of its fair value measurements following a three-tier hierarchy based on the inputs used to measure fair value. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk. Inputs may be observable or unobservable. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability that are developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability that are developed based on the best information available.

Various inputs are used in determining the value of the Fund's investments as of the end of the reporting period. When inputs used fall into different levels of the fair value hierarchy, the level in the hierarchy within which the fair value measurement falls is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The designated input levels are not necessarily an indication of the risk or liquidity associated with these investments. These inputs are categorized in the following hierarchy under applicable financial accounting standards:

- Level 1 – Unadjusted quoted prices in active markets for identical investments, unrestricted assets or liabilities that the Fund has the ability to access at the measurement date;
- Level 2 – Quoted prices which are not active, quoted prices for similar assets or liabilities in active markets or inputs other than quoted prices that are observable (either directly or indirectly); and
- Level 3 – Significant unobservable prices or inputs (including the Fund's own assumptions in determining the fair value of investments) where there is little or no market activity for the asset or liability at the measurement date.

The following is a summary of the inputs used to value the Fund's investments as of September 30, 2023:

The following table summarizes the valuation techniques and significant unobservable inputs used for the Fund's investments that are categorized in Level 3 of the fair value hierarchy as of September 30, 2023.

Corporate Bond	749,794	Approach	Control	N/A	Increase
	<u>\$ 765,843</u>				

⁽¹⁾ This column represents the directional change in the fair value of the Level 3 investments that would result from an increase to the corresponding unobservable input. A decrease to the unobservable input would have the opposite effect.

Cash & Cash Equivalents: The Fund considers its investment in a Federal Deposit Insurance Corporation ("FDIC") insured interest bearing account to be cash and cash equivalents. Cash and cash equivalents are valued at cost plus any accrued interest. The Fund maintains cash balances, which, at times may exceed federally insured limits. The Fund maintains these balances with a high quality financial institution.

Non-Diversified Status

The Fund is a “non-diversified” management investment company. Thus, there are no percentage limitations imposed by the Investment Company Act on the Fund’s assets that may be invested, directly or indirectly, in the securities of any one issuer. Consequently, if one or more securities are allocated a relatively large percentage of the Fund’s assets, losses suffered by such securities could result in a higher reduction in the Fund’s capital than if such capital had been more proportionately allocated among a larger number of securities. The Fund may also be more susceptible to any single economic or regulatory occurrence than a diversified investment company.

Limited Liquidity

Shares in the Fund provide limited liquidity since shareholders will not be able to redeem Shares on a daily basis. A shareholder may not be able to tender its Shares in the Fund promptly after it has made a decision to do so. In addition, with very limited exceptions, Shares are not transferable, and liquidity will be provided only through repurchase offers made quarterly by the Fund. Shares in the Fund are therefore suitable only for investors who can bear the risks associated with the limited liquidity of Shares and should be viewed as a long-term investment.

Credit Risk

There is a risk that debt issuers will not make payments, resulting in losses to the Fund. In addition, the credit quality of a debt instrument by the Fund may be lowered if an issuer’s financial condition changes. Lower credit quality may lead to greater volatility in the price of a debt instrument and thereby in shares of the Fund. Lower credit quality also may affect liquidity and make it difficult to sell the debt instrument. Default, or the market’s perception that an issuer is likely to default, could reduce the value of a debt instrument, thereby reducing the value of your investment in Fund shares. In addition, default may cause the Fund to incur expenses in seeking recovery of principal or interest on its portfolio holdings.

Market and Geopolitical Risk

The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region, or financial market. Securities in the Fund’s portfolio may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, climate change and climate related events, pandemics, epidemics, terrorism, regulatory events and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years, such as terrorist attacks around the world, natural disasters, climate change and climate related events, social and political discord or debt crises and downgrades, among others, may result in market volatility and may have long term effects on both the U.S. and global financial markets. It is difficult to predict when similar events affecting the U.S. or global financial markets may occur, the effects that such events may have and the duration of those effects. Any such event(s) could have a significant adverse impact on the value and risk profile of the Fund’s portfolio.

Federal Income Taxes: The Fund complies with the requirements under Subchapter M of the Internal Revenue Code of 1986, as amended, applicable to regulated investment companies and intends to distribute substantially all of its net taxable income and net capital gains, if any, each year so that it will not be subject to excise tax on undistributed income and gains. The Fund is not subject to income taxes to the extent such distributions are made. As of and during the year ended

September 30, 2023, the Funds did not have a liability for any unrecognized tax benefits in the accompanying financial statements. The Funds recognize interest and penalties, if any, related to tax liabilities as income tax expense in the Statements of Operations. The Funds file U.S. federal, state and local income tax returns as required. The Funds' tax returns are subject to examination by the relevant tax authorities until expiration of the applicable statute of limitations, which is generally three years after the filing of the tax return for federal purposes and four years for most state returns. The Funds' administrator has analyzed the Funds' tax positions and has concluded that as of September 30, 2023, no provision for income tax is required in the Funds' financial statements related to these tax positions.

Investment Transactions and Investment Income: Investment transactions are accounted for on the date the investments are purchased or sold (trade date basis for financial reporting purposes). Realized gains and losses from investment transactions are reported on an identified cost basis. Interest income, which includes accretion of discounts and amortization of premiums, is accrued and recorded as earned using the effective yield method. Dividend income is recognized on the ex-dividend date. All of the realized and unrealized gains and losses and net investment income are allocated daily to each class in proportion to its average daily net assets. Paydown gains and losses on mortgage-related and other asset-backed securities, if any, are recorded as components of interest income in the Statement of Operations.

Distributions to Shareholders: The Fund normally pays dividends, if any, quarterly, and distributes capital gains, if any, on an annual basis. Income dividend distributions are derived from interest and other income the Fund receives from its investments, including short term capital gains. Long term capital gain distributions are derived from gains realized when the Fund sells a security it has owned for more than one year. The Fund may make additional distributions and dividends at other times if its investment advisor has determined that doing so may be necessary for the Fund to avoid or reduce taxes. Net investment income/(loss) and net realized gain/(loss) may differ for financial statement and tax purposes.

Repurchase Offers

The Fund is a closed-end investment company structured as an interval fund and, as such, has adopted a fundamental policy to make quarterly repurchase offers, at NAV, of no less than 5% of the Fund's outstanding Shares on the repurchase request deadline. The Fund will offer to purchase only a small portion of its Shares each quarter, and there is no guarantee that shareholders will be able to sell all of the Shares that they desire to sell in any particular repurchase offer. Under current regulations, such offers must be for not less than 5% nor more than 25% of the

September 30, 2023

Fund's Shares outstanding on the repurchase request deadline. If shareholders tender for repurchase more than the repurchase offer amount for a given repurchase offer, the Fund will repurchase the shares on a pro rata basis. However, the Fund may accept all shares tendered for repurchase by shareholders who own less than one hundred shares and who tender all of their shares, before prorating other amounts tendered. In addition, the Fund will accept the total number of shares tendered in connection with required minimum distributions from an IRA or other qualified retirement plan. It is the shareholder's obligation to both notify and provide the Fund supporting documentation of a required minimum distribution from an IRA or other qualified retirement plan.

5. CAPITAL STOCK

The Fund is authorized as a Delaware statutory trust to issue an unlimited number of Shares. The minimum initial investment in the Fund by any investor is \$100,000. However, there are no initial or subsequent investment minimums for accounts maintained by financial institutions (such as registered investment advisers and trusts) for the benefit of their clients who purchase shares through investment programs such as (1) fee-based advisory programs; (2) employee benefit plans (e.g., 401(k) or 457(b) retirement plans; (3) mutual fund platforms; and (4) consulting firms. In addition, there is no initial or subsequent investment minimum for Trustees or officers of the Fund, directors, officers and employees of the Adviser or Distributor or any of their affiliates. Minimum investment amounts may be waived in the discretion of the Fund or the Adviser. The

September 30, 2023

Distributor is not required to sell any specific number or dollar amount of the Fund's shares, but will use commercially reasonable efforts to sell the shares.

A substantial portion of the Fund's investments will be illiquid. For this reason, the Fund is structured as a closed-end interval fund, which means that the shareholders will not have the right to redeem their Shares on a daily basis. In addition, the Fund does not expect any trading market to develop for the Shares. As a result, if investors decide to invest in the Fund, they will have very limited opportunity to sell their Shares. For each repurchase offer the Board will set an amount between 5% and 25% of the Fund's Shares based on relevant factors, including the liquidity of the Fund's positions and the shareholders' desire for liquidity. A shareholder whose Shares (or a portion thereof) are repurchased by the Fund will not be entitled to a return of any sales charge that was charged in connection with the shareholder's purchase of the Shares.

Pursuant to Rule 23c-3 under the Investment Company Act, on a quarterly basis, the Fund offers to repurchase at NAV per share determined as of the close of regular trading on the New York Stock Exchange no later than the 14th day after the repurchase offer ends, or the next business day if the 14th day is not a business day. The results of the repurchase offers conducted for the year ended September 30, 2023 are as follows:

The dots are of varying sizes and brightness, creating a sense of depth and movement. The lines connect the dots, forming a mesh that follows the curve of the wave. The overall aesthetic is futuristic and technological.
